

## THE UNIVERSAL SOURCE OF MONTE SAN SALVATORE

The landscapes on the earth's surface are all manifestations of the inner earthly consciousness. Every river, every forest, every sea and also every mountain expresses a certain aspect of this consciousness. Some landscapes resonate with the cosmos surrounding us, they carry the properties of planets, stars, black holes and even entire galaxies.

Monte San Salvatore plays a very special role in this regard. This mountain beside Lake Lugano brings earthly existence into contact with the origin of everything. She is a gateway to the Universal Source.

The purpose of this workshop is to listen to this mountain. What does she have to tell us? What is our relationship as humans to the Universal Source and what does this source mean for Gaia, the life-giving principle of our planet?

- Date and time: June 15 from 10h to 17h.
- Place of appointment: will be given by registration.
- Bring: walking shoes (3 hours walking with stops), picnic.
- Contribution: free contribution.
- Register: [flussodivita@bluewin.ch](mailto:flussodivita@bluewin.ch)

See you then!

Heartily,

Haro Wijnsouw, Lisa Nosedà
